State	Finished
Completed on	Wednesday, 12 August 2026, 7:19 PM
Time taken	5 mins 36 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include <stdio.h>

void factor(int num, int *count) {
    int i;
    for (i = 1; i <= num; i++) {
        (*count)++;
        if (num % i == 0) {
            (*count)++;
        }
        (*count)++;
    }
    (*count)++;
}

int main() {
    int num, count = 0;

    scanf("%d", &num);

    factor(num, &count);

    printf("%d", count);
    return 0;
}
```

	Input	Expected	Got	
✔	12	31	31	✔
✔	25	54	54	✔
✔	4	12	12	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
